

Polestar 3

The SUV for the electric age

The Polestar collection now consists of three models and continues to expand. This is Polestar 3, an electric performance SUV defined by sculpted surfaces, discreet details, and optimised dynamics. The result is a sleeker, more technical SUV, integrating technology, such as the optional LiDAR system, to enhance the driver experience and the thrill of electric driving.

Acceleration from 0 to 100 km/h¹

4.7 sec

Power up to¹

380 kW
517 hp

Performance

The dual-motor powertrain delivers 360 kW of power and 840 Nm of torque. The optional Performance pack increases those figures to 380 kW and 910 Nm respectively. Torque vectoring increases turn-in and control, and Brembo brakes are standard for every Polestar 3 for maximum stopping power.

Charging speed¹

DC 250 kW, from 10 to 80%

30 min

AC 11 kW, from 0 to 100%

11 hrs

Inner space

The generous interior space of Polestar 3 is a seamless extension of the exterior design. The electric powertrain creates a flat floor throughout the cabin enhancing the feeling of space. Subtle details and curated materials find room for expression. Ambient lighting highlights vents, foot wells, and tactile door surfaces, to add a sense of luxury felt by every passenger.

Sustainability by design

When changing the automotive landscape, electrification is a great start. But not enough. For Polestar 3, sustainability begins even before the first drive. Blockchain technology traces minerals used, and upholstery such as leather and wool, are animal welfare traced. A sustainability declaration is even printed on the seats as proof. Recycled materials are included at every opportunity, ensuring the smallest possible footprint and emissions throughout the car's lifecycle.

Charcoal WeaveTech with tectonic deco.

Sound experiences

The Bowers & Wilkins for Polestar sound system includes 25 speakers and a total output of 1610 Watts for fully immersive 3D surround sound. Dolby Atmos technology ensures sublime clarity, depth, detail. The High Performance Audio option also uses the Polestar 3 interior to deliver balance and memorable moments in sound. Active road noise cancellation blocks out unwanted frequencies from wind, tyre, and other road noises, but includes necessary noises such as sirens, car horns, and traffic signals.

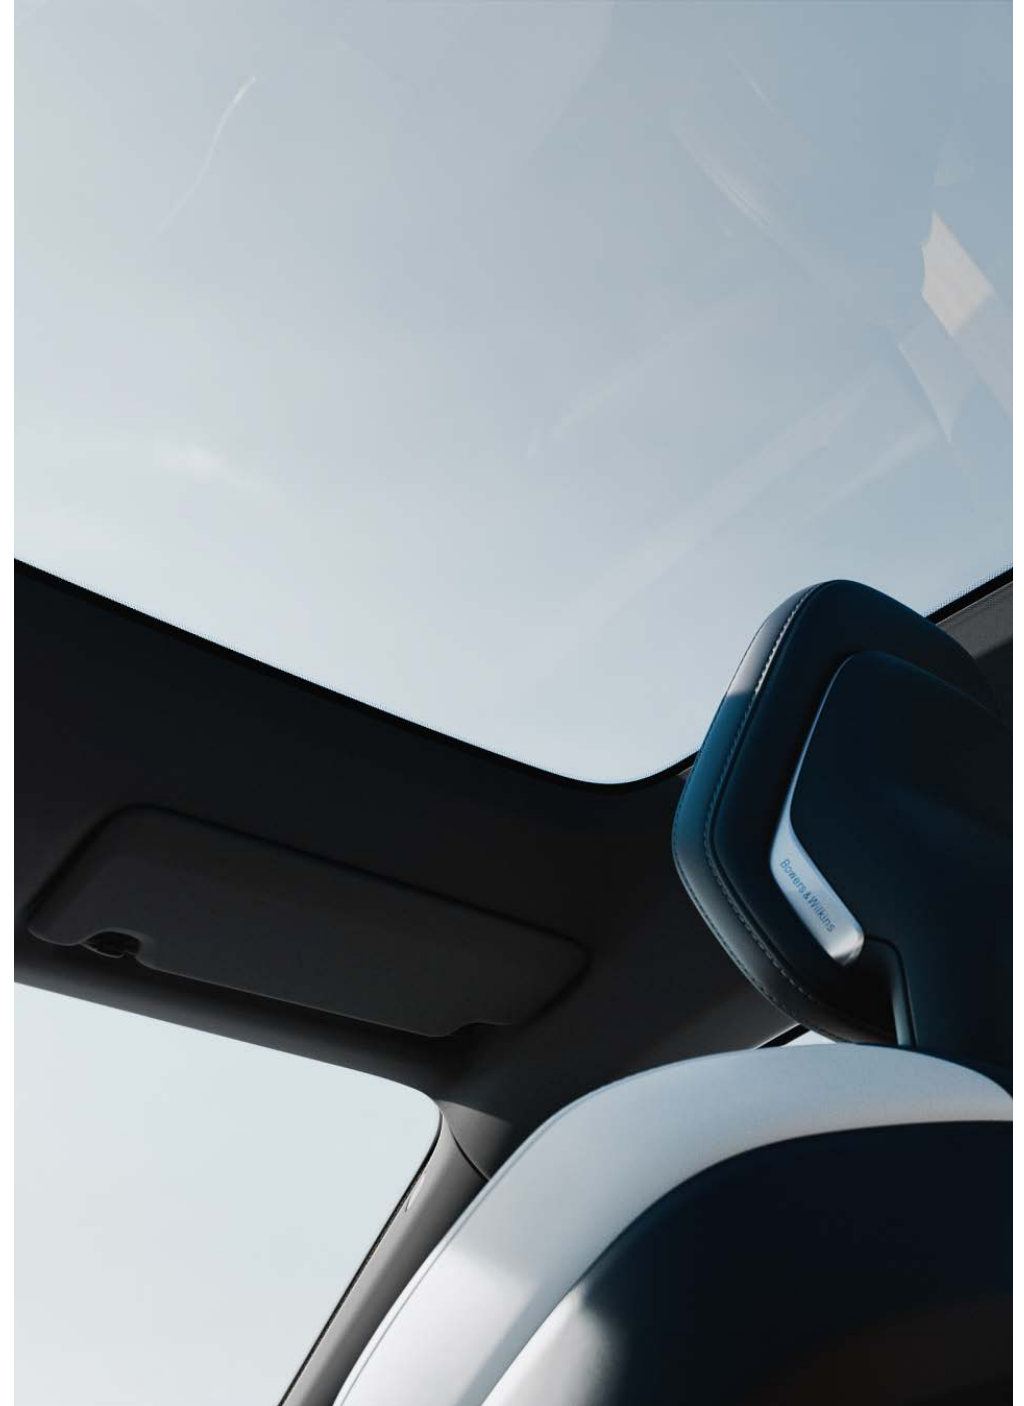

Roofline

By lowering the roofline, Polestar 3 has a distinctive silhouette ideally suited for electrification and without compromising on interior space.

Panoramic roof

Made of hi-tech, laminated glass, the panoramic roof reduces 95.5% of UV radiation, lowers cabin noise, and increases the feeling of space within.

Outer design

Design is the tool we use to integrate the latest intelligent technology into the exterior design of Polestar 3. This results in sculpted surfaces, discreet details, and optimised aerodynamics to give a sleeker, more technical look.

Headlights

The optional HD LED headlights use 1.3 megapixels to optimise the light pattern in all driving conditions. The pixels are also able to shade out oncoming vehicles reducing glare and improving safety.

Not available in North America.

Aerodynamics

The rear wing and aero blades work to optimise airflow across the body surface. This reduces drag and turbulence while optimising range.

Rear light bar

The rear light bar illuminates adaptively to the surrounding light conditions.

Packs and options

An exclusive range of exterior colours and interior themes, along with packs and single options, are designed to make every Polestar 3 configuration feel personal.

Including

- Pilot assist
- Lane change assist
- Park Assist Pilot
- 360° Cameras with 3D view

Pilot pack

Including

- LiDAR from Luminar
- 3x additional cameras:
 - 1x Long range front-facing camera
 - 2x Side view cameras
- Camera and sensor cleaning on front and side cameras
- Additional NVIDIA Orin core computer with 254 TOPS
- Heated front wiper blades

Pilot pack with LiDAR
Requires Pilot pack

Including

- Graphical Head-up display
- Bowers & Wilkins for Polestar
- Soft close doors
- Power operated steering column
- Air Quality – PM2.5 sensor and filter
- Infrared coating windscreen
- Laminated acoustic lower rear windscreen
- Heated steering wheel
- Heated rear seats
- Heated front wiper blades
- Foldable load floor rear storage compartment

Plus pack
Requires Pilot pack

Including

- 21" Pro wheel
- Black seatbelt with Swedish gold stripe
- Laser-etched light line in Swedish gold
- Swedish gold valve caps

Pro pack
Not applicable with Performance pack

Including

- 22" Performance wheel
- Polestar Engineered chassis tuning
- Performance optimised tyres
- Brembo front brake callipers in Swedish gold
- Performance mode (Performance/Range)
- Laser-etched light line in Swedish gold
- Swedish gold seatbelts
- Swedish gold valve caps

Including

- Colour upgrade (Premium colour Snow)
- 1.3-Megapixel HD LED headlights [1] (Requires Plus pack)
- 22" Sport (Requires Pro pack, not applicable with Performance pack)
- 21" Plus (Not applicable with Pro pack or Performance pack)
- Charcoal Bio-attributed MicroTech with repurposed Aluminium deco
- Charcoal Animal welfare wool with repurposed Aluminium deco
- Power foldable towbar [2] (2,200 kg) (3,500 lbs North America Tow hitch)
- Privacy glass rear windows
- AC Charging cable for public/home wallbox [3]

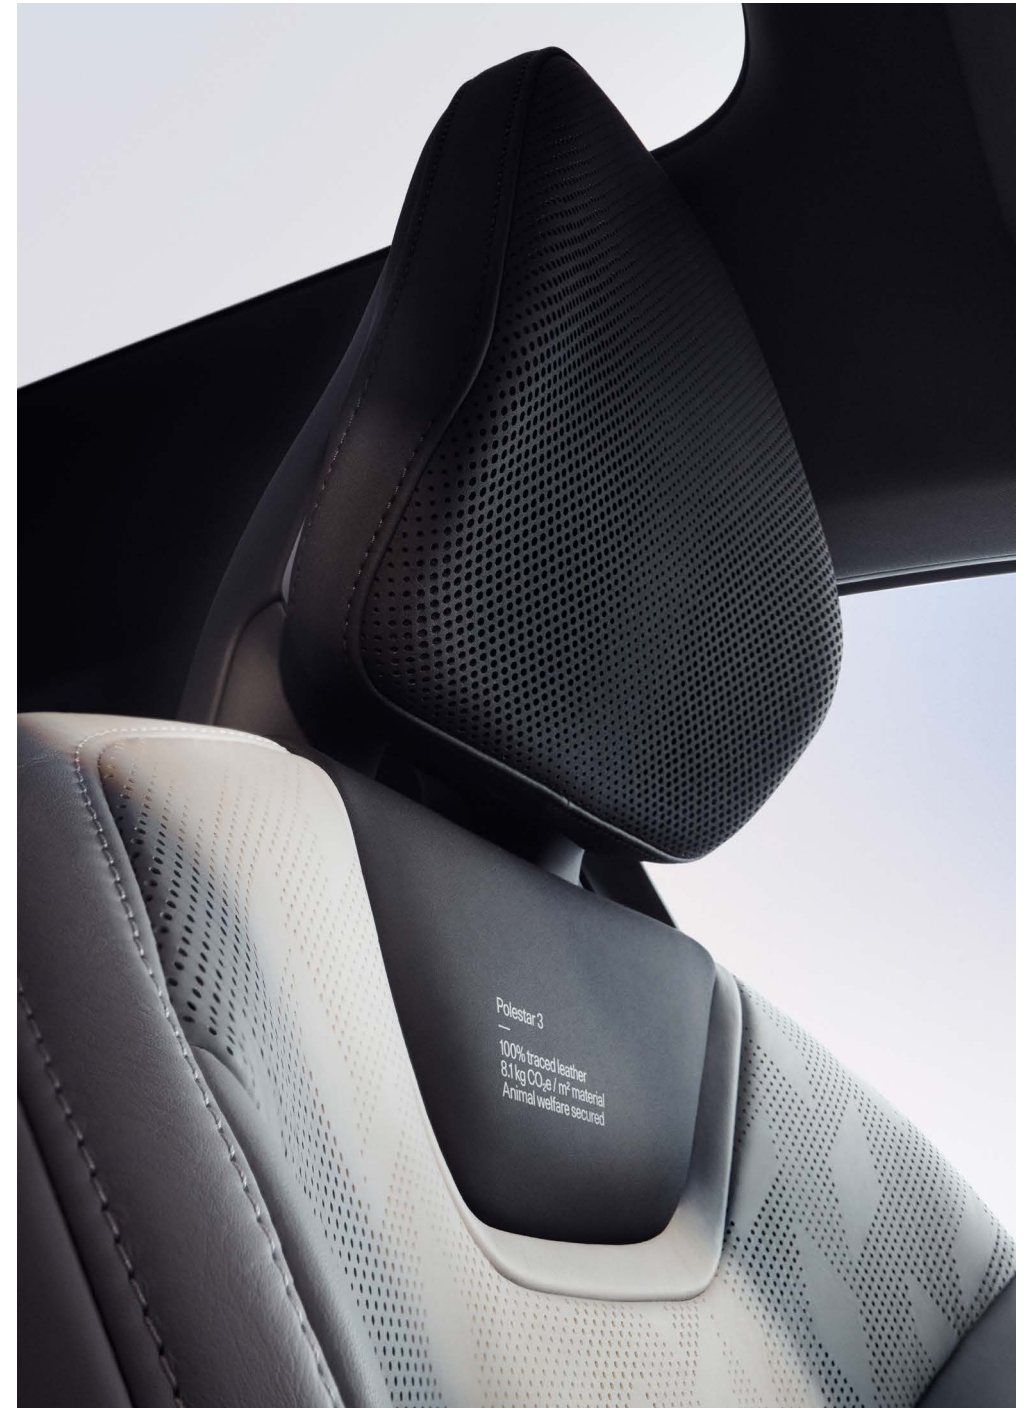

Additional upgrades

Including

- Animal welfare Nappa leather seats in Jupiter/Zinc/Charcoal
- Massage in front seats
- Ventilation in front seats
- Power side support in front seats
- Black ash deco

Nappa upgrade
Requires Plus pack

Safety

Polestar 3 shares safety technology with Volvo Cars. Structural innovations protect occupants, while advanced sensory technology prevents collisions, protecting pedestrians and cyclists. The driver is always informed of changing road conditions ahead. Information is shared in real-time with other connected Polestar cars.

Reasons to add Polestar to your fleet

01

Charging

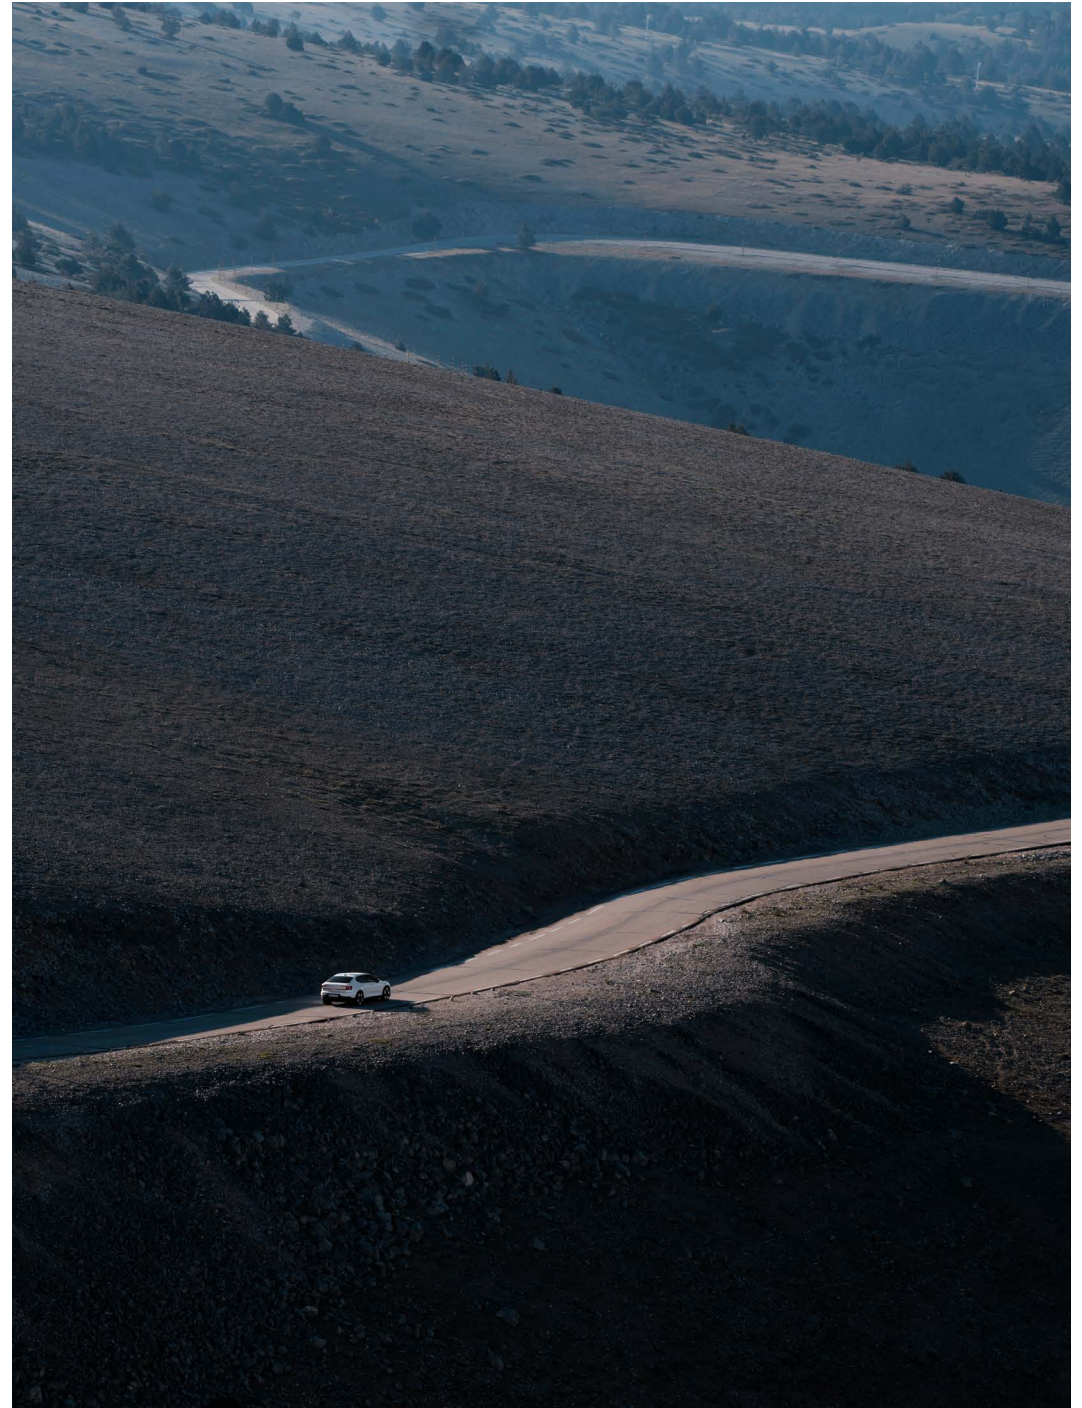

Reliable charging is essential when owning an electric vehicle. Adding Polestar to your fleet comes with solutions that make this experience effortless. Polestar Charge connects the largest charging networks in Europe into one app, bringing access to over 850,000 stations and eliminating the need for multiple apps and payment methods. There are even exclusive discounts and local deals available with the add-on subscription.

Reasons to add Polestar to your fleet

02

Sustainability

We publish Life Cycle Assessment (LCA) reports for all Polestar models, model years and variants, offering complete transparency on our vehicles and their carbon footprint. This enables informed decisions and alignment with your corporate climate goals and ambitions. Polestar operates with sustainability at the core, guided by a dedicated climate roadmap to minimise our climate impact, committed to reaching net-zero emissions by 2040.

Service

The Polestar ownership experience reaches far beyond the driver's seat. With a growing network of service and maintenance points, we provide fast, convenient access to technical expertise at over 1100 locations across Europe. As a Polestar driver, you are, on average, only eleven kilometres away from your nearest service point. Collaborating with Volvo Cars brings access to a global leading infrastructure of technical expertise, spare parts, logistics, and knowledge right where and when you need it.

Reasons to add Polestar to your fleet

04

Performance

Our cars are engineered for a single purpose: To increase the pleasure of driving. With pure performance, progressive innovation, and minimalistic design as the foundation, we challenge traditional luxury and performance vehicles by creating truly desirable electric cars.
